TOWBAR 'S' (KG) VALUE MAX VERTICAL LOAD. You will find this information on a label or plate as the 'S' value in Kg at your towbar. You will need to refer to your vehicle handbook to get the maximum towing weight for your particular vehicle, as different models of each vehicle will have different towing capacities.

VERTICAL LOAD = Also called nose weight, is the maximum vertical pressure (kg) that can be put on the towbar = **'S' value**

VERTICAL PAYLOAD = The difference between Car & truck rack combination gross weight, and the vertical load carrying capacity 'S' value

IMPORTANT Cargo weight and car & truck rack gross weight, must not exceeded the **maximum vehicle vertical load**.
